CONVEYOR TECHNOLOGY
CONVEYOR BELTS & SMALL CONVEYOR BELTS

Conveyor belts & small conveyor belts
for the food industry

Conveyor belts are the ideal solution for the food industry if you want to transport food, products or other goods safely and hygienically.

We adapt the conveyor belt to your requirements in terms of length and width. The conveyor belts are driven by a motor and are adjusted according to the weight of the transported goods.

The conveyor belts feature the following details:

- Hygienic design
- Robust design
- High-quality components
- Low maintenance

Due to their high-quality materials, the conveyor belts are versatile and ideal for the food industry. The rubber belt conveyor, for example, is ideal for transporting foodstuffs. A chain conveywaor belt, on the other hand, is ideal for transporting goods. Rollers are generally suitable for conveying pallets, crates or other goods.
